

# THE PLASTIC METAMORPHOSIS

The Journey from Industrial Waste to High-Performance Bioplastics

## Welcome to the INCIRCULAR Materials Exhibition.

This panel displays the real, physical materials marking each stage of our circular recycling process.

We take discarded plastic waste from industrial factories, combine it with recycled natural fibers (such as paper and wood waste), and transform it into a completely new, sustainable material.

Follow the line to see and feel the transformation at every step!
